 - Local Area Network

Ahead Food Point-of-Sale System is an advance and complete business solution specifically designed for the food and beverage sector to fully automate and simplify the daily management of its sales and inventory transactions. The system is supported with industrial type and durable POS terminal built on touch screen technology and other peripherals, which provides high performance and reliability whilst retaining flexibility to function.

Key Features:

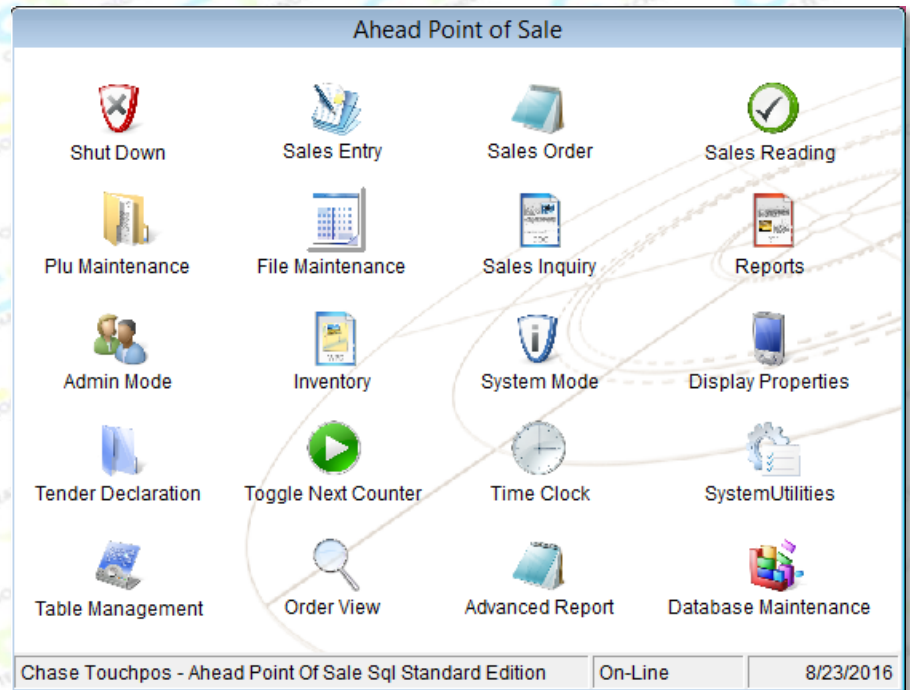

- Flexible hardware configuration
- Fully automated, real-time and synchronized sales point of sales transactions.
- Produces detailed sales reports, profit report, discount reports, cashiers accountability report, inventory reports, and many more.
- All reports can be exported to different file format
- The system's inventory generates auto-reorder based on sales, sales order, and min/max.
- Extensive password protection for high-level security
- Can be configured with other AHEAD softwares

Ahead Food Point-of-Sale System
