

## Ahead Event and Concert Ticketing System

**Event and Concert Ticketing System** was designed to develop customized tickets for your business use.

Design your own ticket through this system and achieved remarkable satisfaction on your business. It has a multi-option menus for customized ticket designs and ticket sizes. Integrable with ticket printers, the system allows you to print multiple tickets continuously without interventions. Enables you to authenticate tickets that reduces fraud and improves queuing of customers. The system also allows you to generate multiple tickets and tracks ticket numbers. Thus, enables you to generate reports base on sold and available tickets. This system is also applicable for terminal, movie houses, and other business that requires ticketing service. Designed with an auto-reordering feature where the user has the option to print reports in different categories. CTC's ECTS reduces the risk of having fall-in-line troubles and priority frauds.

### **BENEFITS:**

- Customers will be able to view the reserved and available seats for a event in a particular theater and airing-time
- Able to view the event that are currently showing or will be showed in the future in a particular theater
- Gives privilege to the customer to be able to choose the best seat in watching the event
- No need for customers to inquire for the ticket price

**Simultaneous viewing of event schedule, ticket price and event trailer**
